产品发布会 Product Presentation

Freeflex™ 家族中的硬丝和可热成型丝非常适合鞋面应用。

该丝不仅强度高、模量高，而且还“多才多艺”，可用于制造全TPU鞋、实现鞋面的3D效果、定制各种图案和色彩等，在实现设计自由度的同时确保穿着舒适。

Freeflex's rigid and thermal moldable fiber is perfect for shoe upper applications. The fiber is not only known for its strength and excellent rigidity but also its versatility. Freeflex is able to conform to any shape or style of the footwear whilst at the same time ensuring sensorial comfort for the wearer. In addition, the all-purpose material can change the colors and appearance even for the most complex textile designs.
