The fabric is made from recycled polyester and the desire is to create a fabric that renews values by adding a little idea and essence to make people feel comfortable and happy all day long.</p> <p>Orgamix™ 100% organic cotton mélange yarn spun in our original colours. Characterised by the softness of the top-dyed yarn and the mélange with a deep colour. It is GOTS certified, with low environmental impact.</p>
<p>styletex Made in JAPAN</p> 	<p>Styletex Co Ltd Cotton Hall 5.1-D62 https://www.styletex.co.jp/</p> <p>Styletex has its manufacturing facility located in Saitama Prefecture, Japan, which allows it to handle all production stages related to dyeing, preparation, and weaving. The entire fabric processing is carried out domestically within Japan. They utilise a variety of raw materials, such as silk, polyester, nylon, and primarily yarn-dyed warp threads, as well as dyed cotton, thick fabrics, and an assortment of other woven textiles.</p>

	<p>At the Autumn edition, they will feature a high-density yarn-dyed fabric made from extra-long staple cotton. The yarn is dyed with different colours vertically and horizontally, giving it a chambray-like colour. The yarn is dyed with Threne dyes (light to medium colours) and sulfur dyes (dark colours), both of which have excellent light fastness.</p>
 <p>The image shows the logo for TOKO SHOJI CO., LTD. which consists of the letters 'TOKO' in a stylized font with red and blue dots. Below the logo is a photograph of several fabric samples. The top sample is a light-colored fabric with a fine, woven texture. Below it is a darker fabric with a similar texture. The bottom sample is a dark fabric with a distinct, repeating geometric pattern.</p>	<p>Toko Shoji Co Ltd Functional Hall 5.1-D86 http://www.tokoshoji.co.jp/en/</p> <p>Toko Shoji is a fabric trading company that was founded over 80 years ago. They deal in unique fabrics that are printed using minerals.</p> <p>One of their product features is fabrics developed utilising far-infrared technology, which offers the benefit of promoting blood circulation while maintaining a soft hand feel. Through the emission of far-infrared heat, these fabrics provide the added advantage of enhancing blood circulation.</p>
