NINGBO WEIYI PLUSH CO.,LTD.

China

Hall 7.1-E102

www.macinfur.com

Ningbo Weiyi Plush is a professional high-end manufacturer of artificial fur with first-class production equipment, advanced technology, strict quality management, and an excellent management and R&D team. The company has advanced artificial fur production equipment and can produce a full range of warp-knitted artificial fur.

At Intertextile, they will present the theme "A New Colourful World" and introduce fabrics made from recycled polyester, produced through different weaving and finishing processes. The key fabric products will focus on mink-like fabrics and patterns, including solid colours, prints, jacquards, and more. Due to changes in raw materials and weaving methods, these fabrics are more resistant to pressure and have lower shedding rates.

CHANGSHU ZHENGTAI TEXTILES CO., LTD.

China

Hall 7.1-G109

www.jsztex.com

Changshu Zhengtai Textiles is a professional artificial fur factory that integrates weaving, dyeing, finishing, and home textile production. The main products include various faux rabbit fur, various curly plush fabrics, mink-like fabrics, velvet fabrics, and composite products. Currently, the company has established strategic partnerships with over 100 world-renowned brands such as INDITEX, COSTCO, TJX, H&M, TARGET, WALMART, ROSS, GU, and KMART.

Key product styles include various mink-like printed tips, tokay printed tips, and various plush hand-dyed fabrics in solid colours. Trend: With the latest and most advanced digital inkjet technology, the company is rapidly developing new plush patterns.

Wuxi Runfei Plush Products Co Ltd

China

Hall 7.1-E108

www.wuxirunfei.com

Wuxi Runfei mainly produces various simulated plush, lamb plush, rolled plush, cotton plush, sheared plush, PV plush, and other products. Their products range from high-end to low-end, suitable for industries such as clothing, toys, footwear, hats, home textiles, and more.

At Intertextile, they will focus on various long plush and faux fur products suitable for men's and women's fashion. This includes excellent hand-feel synthetic curly plush fabrics, deep-processed forms of tokay fox fur, synthetic plush fabrics, and faux fur suitable for women's outerwear. With a variety of luxurious visual and tactile experiences, these products provide a unique style for winter warmth and fashion.

Zhejiang ZAKER New Material Technology Co., LTD.

China

Hall 7.1-G116

Zhejiang ZAKER mainly focuses on the research and development of water-based synthetic leather and bio-based synthetic leather products, as well as cutting-edge basic technological innovation and ecological construction.

Zhejiang ZAKER will showcase "Retro Transformation" and "Urban Charm" at Intertextile. The "Retro Transformation" series reinterprets and transforms vintage elements, giving them new vitality and a sense of fashion. The "Urban Charm" series embodies the delicacy and charm of urban life, simple yet stylish, seamlessly integrating into the modern urban environment. The products focus on practicality and comfort, meeting the modern urban population's pursuit of high-quality living. Products are made using eco-friendly materials and green production processes to reduce the environmental impact.

Ningbo East Longitude new fabric Co.,ltd

China

Hall 7.1-G78

www.fakefur.cn

Ningbo East Longitude produces recycled fabric series, warp-knitted fabric series, fashionable faux wool fabrics, home textile products, industry-leading non-composite velvet series, non-shedding faux mink, fox fur, and sable fur series, 3070 wool fabric series products, as well as products like mink fur, fox fur, and rabbit fur. These products are widely used in clothing, home textile, and other fields.

Green and environmentally friendly integrated velvet fabric series

A functional fabric that is glue-free, non-composite, non-shedding, anti-pilling and washable. The product can achieve various fabric requirements such as softness, elasticity, stiffness, thickness, thinness, etc. It is suitable for categories such as blankets, sportswear, hoodies, homewear, bathrobes, undershirts, casualwear, shoes, and more.

Ultra-thin long plush fabric series

By using needle-punched fluffing and jacquard weaving techniques, the fabric's bottom feels soft and comfortable, the hairs are stiff, the texture is smooth, and the colours are vibrant. With simulated horsehair series and beaver fur series, this fabric allows long plush to be used not only in winter but also in spring and autumn. The fabric is lightweight, comfortable, and has a strong drape.

Recycled faux fur fabric series

This fabric is woven with high-density circular machines, using various dyeing and deep processing techniques to achieve a high level of simulation while addressing issues such as shedding, rough texture, and insufficient fluffiness in the original fabric. Combining the current international trend of environmentally friendly and degradable materials, the concept of using renewable materials makes this fabric series more in line with future sustainable development trends.
